**FIXI PLC**

**Scalping Policy**

## Scalping Policy

Scalping is a form of trading which FIXI PLC consider to be an unacceptable practice and a type of market abuse. Scalping might be wrongfully used to gain profits by taking advantage of internet latencies, off market/bad prices, delayed prices, or through high volumes of transactions targeting tick fluctuations (rather than price movements) where trades are opened and closed in quick succession.

If we consider you to have undertaken this form of scalping, it will be considered as a breach of our Terms and Conditions and as such we reserve the right to:

- Void or close any trade (i.e., treat the trade as if the trade had never taken place) which was part of any Scalping activity

AND/OR

- Make immediate changes to your account, including but not limited to, the liquidity provided by us and the spread quoted and/or reverse any realised profits earned out of scalping activity

AND/OR

- Immediately terminate your account and your access to our servers.

We will exercise the above rights even if you have entered into (or refrained from entering into) such arrangements with third parties relating to the relevant trades and even if you may suffer a trading loss as a result.

Please be advised that all trading activity is monitored closely, and in our judgement if it is identified that you are engaging or have engaged in scalping activity, we reserve the right to take any one or more abovementioned actions with immediate effect .
